CLARK | REDER
ENGINEERING

4/23/2019

Accurate Staging
13900 S Figueroa St
Los Angeles, CA 90061
Attn: Jose Cantu

RE: What Just Happened 2019 CRE Proj. No.: 19.621.14

Dear Jose:

Per your request we have reviewed the temporary indoor tiered seating risers and rolling deck assembly shown on the attached drawings. The structures are built from Accurate Staging standard product. Our scope has been to verify stability and strength of the structures to support the intended loads. The rolling deck assembly will have a 12' tall scenic piece weighing 250 lbs attached on top. Our analysis has considered the size and weight of the scenic assembly in stability calculations of the rolling deck assembly. We have not reviewed any portion of the construction of the scenic element nor its attachment to the rolling deck assembly.

Our analysis has determined that when constructed as shown on the attached drawings the tiered seating and rolling deck structures will remain stable and safely support the intended loads.

I trust this information is suitable for your needs at this time. Please do not hesitate to contact our office with any questions or comments.

Regards,

Clark-Reder Engineering, Inc.
